

Content Course Eligibility Checklist for Early Childhood/Elementary Education ARL Applicants

To be eligible to participate in Alternative Routes to Licensure to earn an Early Childhood or Elementary Education license, an applicant's transcript must show between 27-38 semester credits related to the Utah elementary education core curriculum. On the quarter system count a minimum of 40 credits and a maximum of 60. Courses not related to the elementary core may not be counted. To convert quarter credits into semester credits, multiply by .66. Each subject area must have at least one applicable course. Only the maximum number of credits can be counted in each category. **(Note: Not all courses on a transcript apply. Those earned through general education requirements are most applicable.)**

APPLICANT'S NAME:

All courses recorded from transcript must be applicable to teaching Elementary Education K-6
